

We build your software

**United
Nations**

Among 400 leading companies
that drive the world forward

Are you looking for an extension of your team to handle your software projects and accelerate growth?

Bulbera is an EU awarded software development company that brings product ideas to life and empowers you to accelerate your business. We build end-to-end solutions and enrich your core team with know-how and expertise. It's fast, transparent and with no fixed cost on an annual basis.

It's no coincidence these companies trust us

“We are very happy with the team, their seniority and developer’s expertise. The team is agile and able to learn fast new technologies and jump into complex solutions. Last year multiple complex implementations were completed in hectic times with great commitment and short timelines and working day and night during weekends. I am looking forward to keep on working with Bulbera and in future with the same passion and professionalism.”

Our digital solutions focus on these 3 industries

healthcare

telecom

**online ordering
& delivery**

But not only. We've successfully worked with these industries:

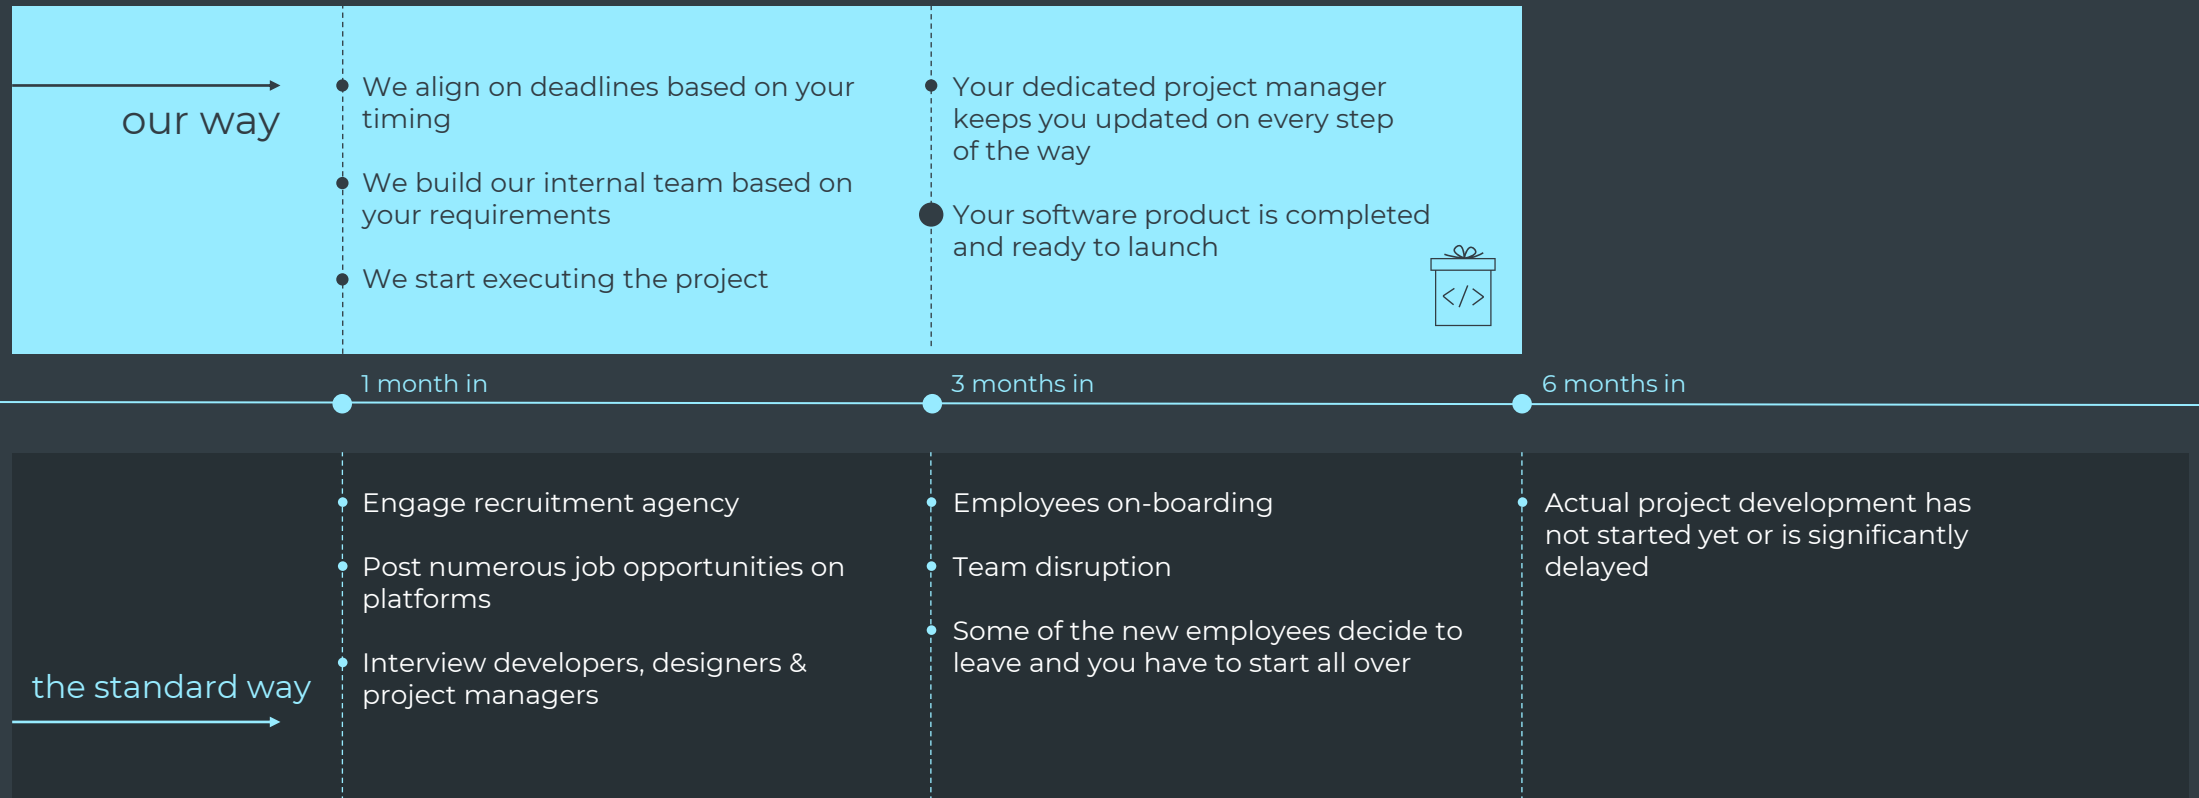

Fintech, E-commerce, Lifestyle, Loyalty & Rewards, IoT, Cyber Security

30+ delivered projects

Enterprise, Mobile, Web, Consultancy

Our way vs. the standard way

The technologies we work with

Because every product needs a different approach

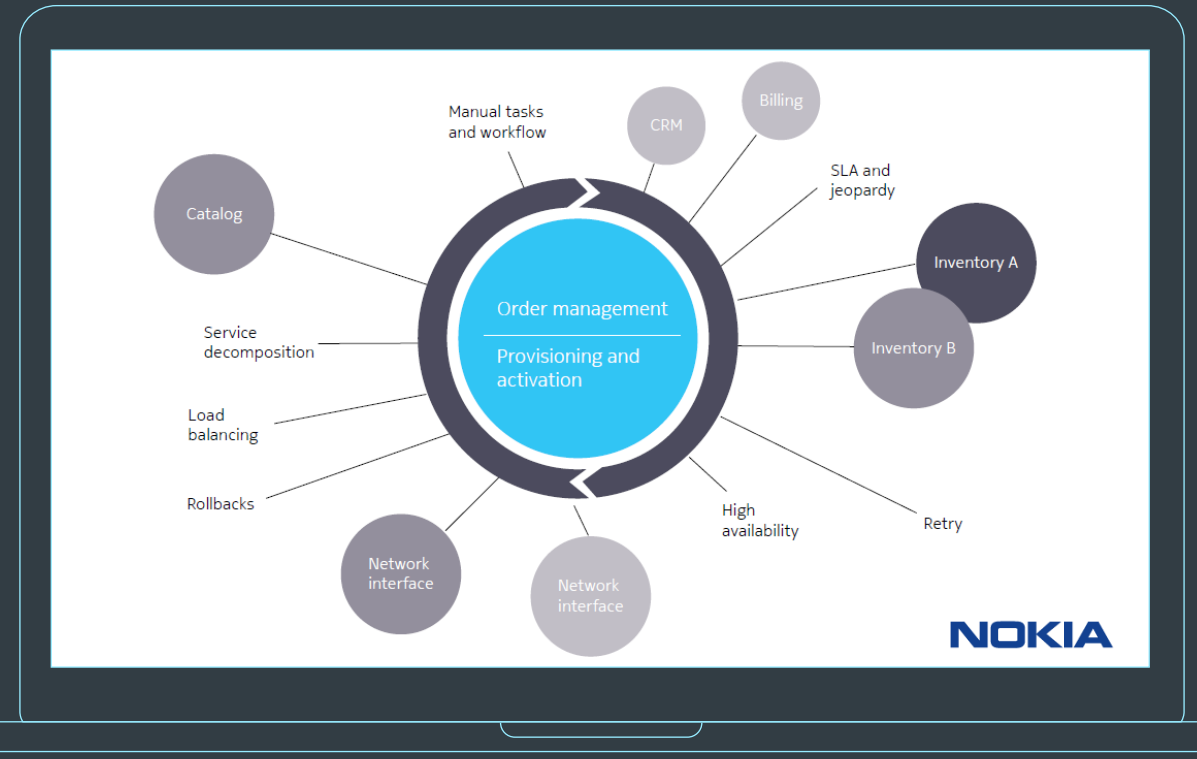

The FlowOne product suite helps telecoms all over the world to control their journey to the all-digital era and network virtualization. It supports end-to-end orchestration of hybrid and virtualized services across multivendor, multi-technology networks and IT infrastructures. It helps telecoms evolve their legacy OSS and fulfillment solutions to support frictionless digital service delivery and accelerate time to market.

Solution

- A catalogue driven fulfillment solution, for traditional OSS Modernization with components such as Catalogue, Inventory, Order Management & Provisioning Modular components fitting customer environment and Open Framework Suite.
- Modular components to provide the key functions of Service Lifecycle Orchestration including: Resource discovery, Service design, Service order, Service orchestration and deployment.

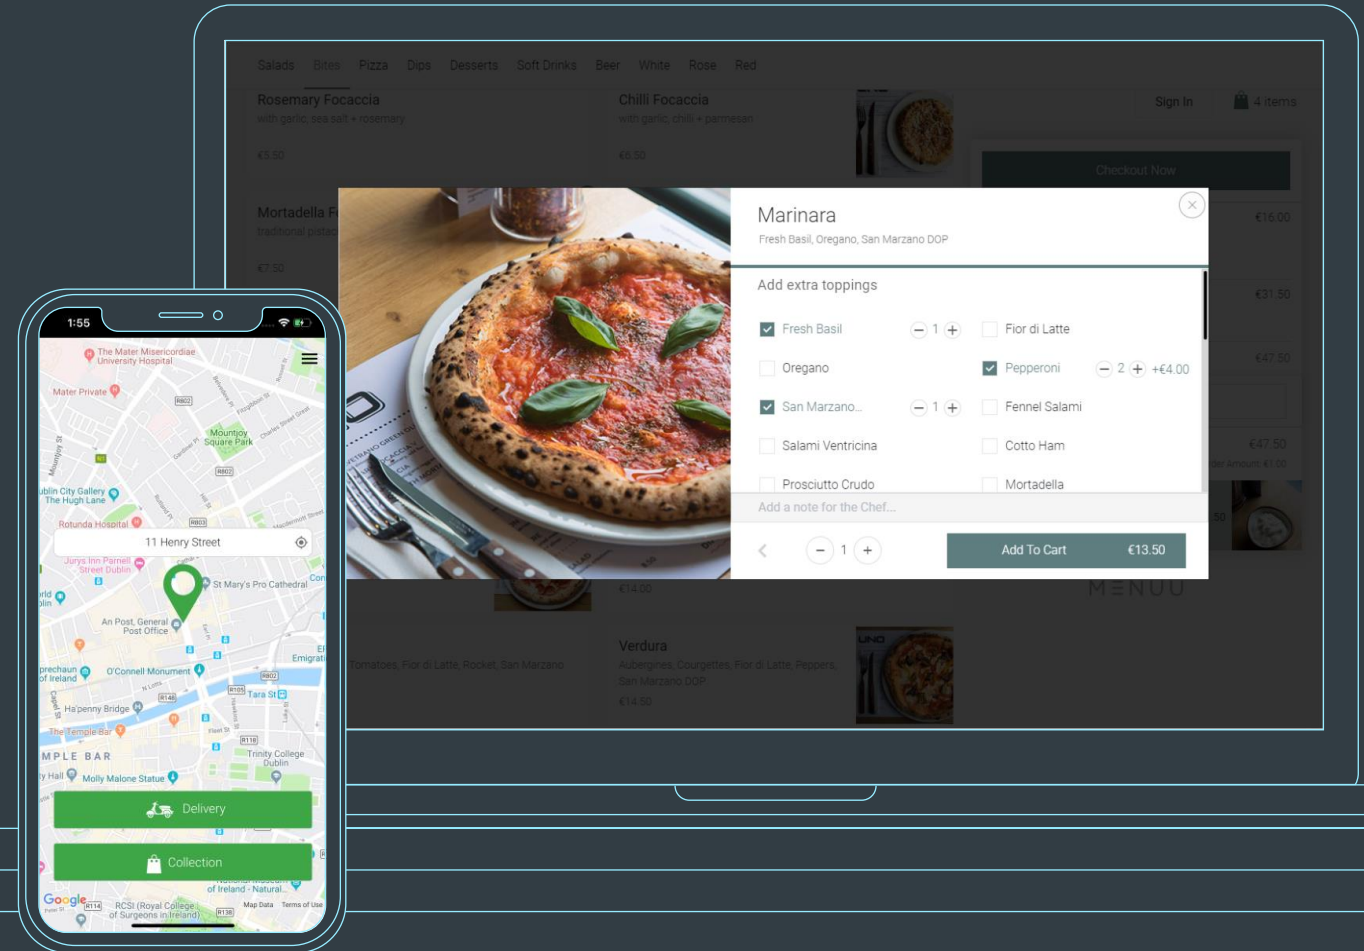

Menuu

The Menuu platform enables easy-to-use online ordering combined with a powerful promotions engine and integrations to leading POS and third party delivery partners. It is built to integrate into the restaurants existing systems, processes and workflows. Its key aspects are digital ordering, marketing and deliveries across single or multiple locations and is available for any device (mobile, web and desktop).

Solution

- Enterprise ready
- Cloud-based highly-available infrastructure
- Integrations with major POS platforms: Andromeda, Lightspeed, Par Pixelpoint, Clover, etc.
- Integrations with leading delivery providers: Deliveroo, Stuart, Door Dash, Postmates, etc.
- Payment gateways integrations: Stripe, Braintree, PayPal, Apple Pay, etc.
- Extensive analytics and reports

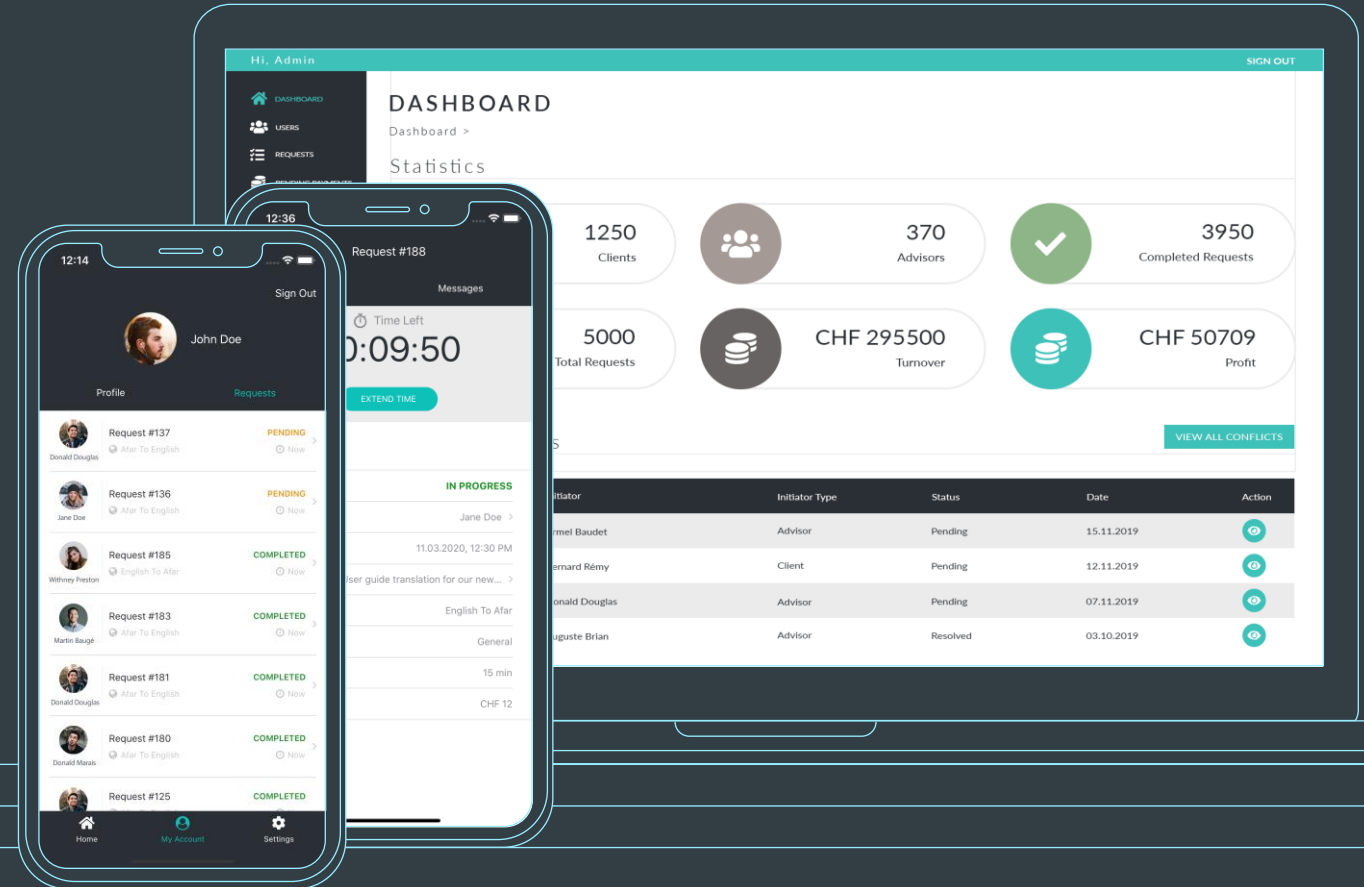

SwissYou

The client needed a modern, end-to-end marketplace solution for advisory services. It had to combine great customer experience, advanced management capabilities through custom-tailored CMS and strong marketing aspect via its website.

Solution

- Advanced booking
- Real-time communication / messaging
- Advanced feedback & conflicts resolution
- Ratings and recommendations options
- Reporting and analytics
- Integrated payment system via Stripe
- Swiss Cloud-based & enhanced data protection and confidentiality rules

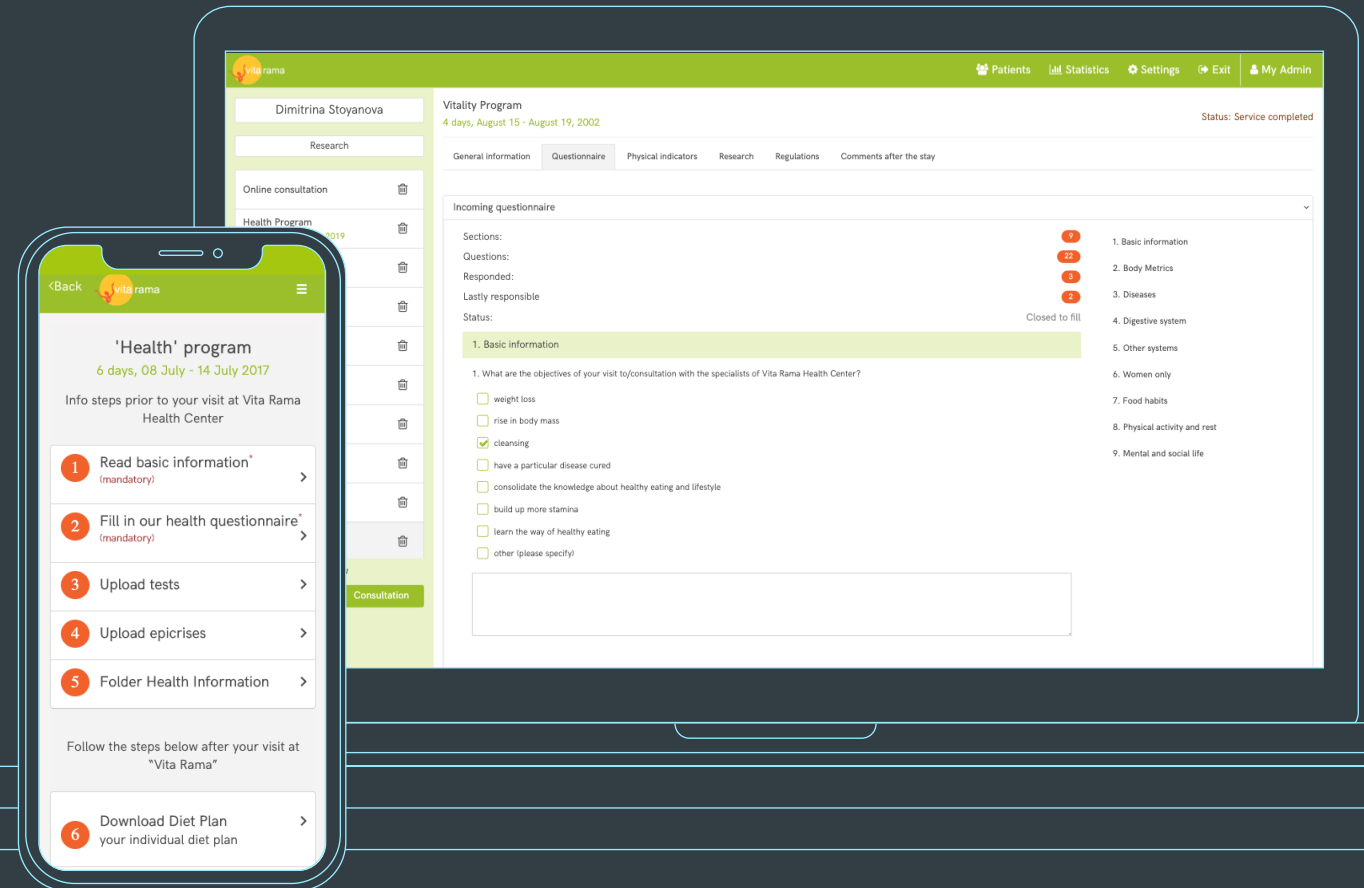

VitaRama

We were approached by the healing center Vita Rama with a task to develop their new patients' management system. The task required to build a brand-new tool which had nothing in common with standard medical software on the market. Vita Rama has a unique workflow and requires specific information to be input by doctors, nutritionists, therapists and patients via personalized accounts.

Solution

- Optimized for mobile experience
- Separate modules for the patients and Vita Rama's team
- Easy management of patients, visits and examinations through custom tailored CMS
- Keeping records of past treatment and results
- Health questionnaires and feedback from the health specialists entirely through the system
- Advanced searching and analytics

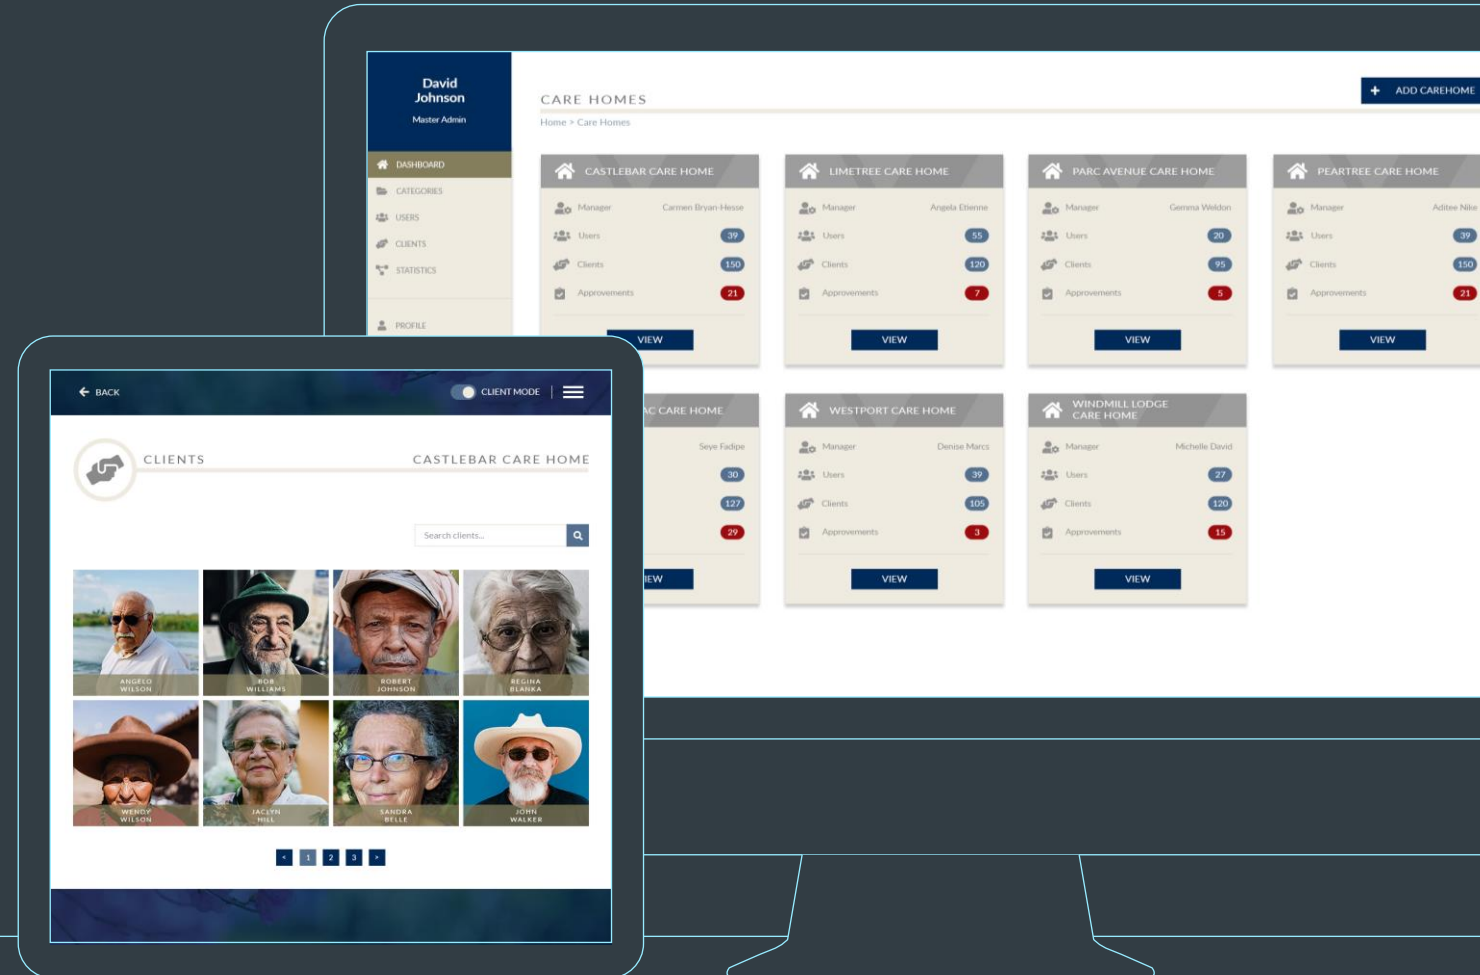

ERP for Care Homes

A full-scale ERP system for a large EU-based care service provider. The platform helps them manage the daily activities in their network of care homes and their teams and facilitates monitoring the wellbeing of their clients. The main focus of the solution is to improve the quality of the service by keeping and organizing personal information for each client so the carers can use it later on their dedicated tablets.

Solution

- Enterprise ready – designed for multiple care homes
- Advanced activities management
- Easy tablet-based access for carers
- Online connection between families and their relatives
- Reporting and analytics
- Cloud-based

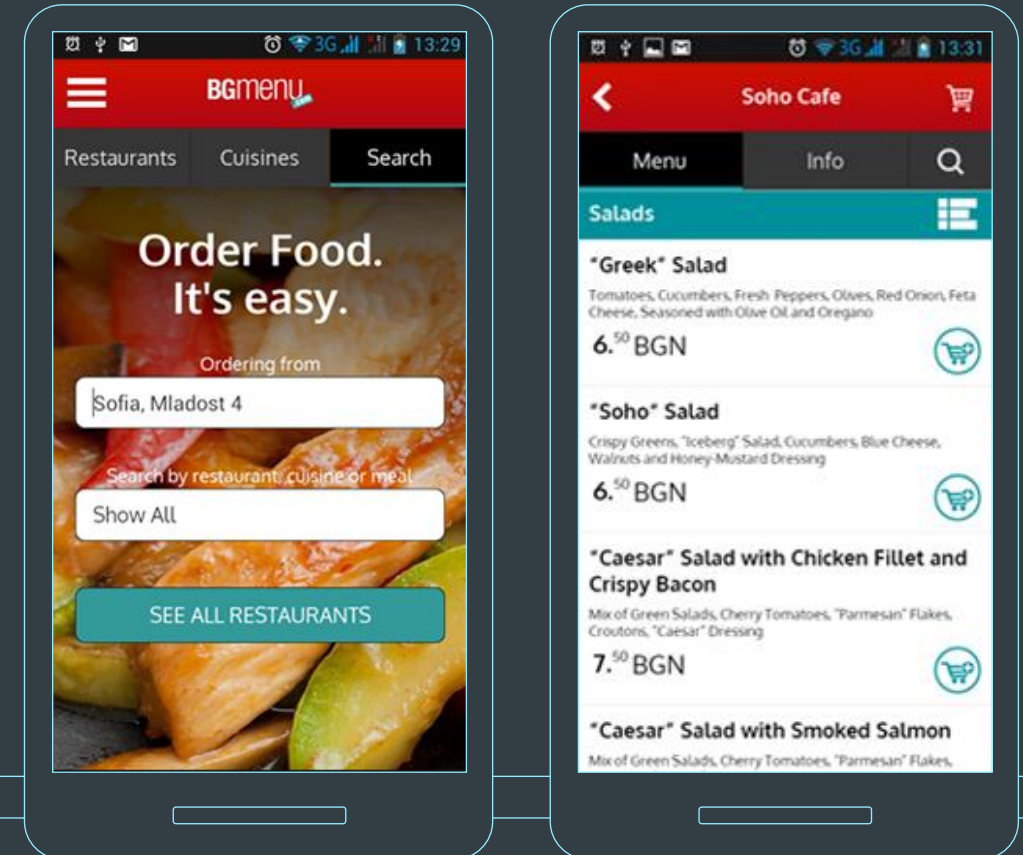

HelloHungry

*Acquired by  Takeaway.com

HelloHungry is one of the largest online food delivery brands in Eastern Europe operating in Romania and Bulgaria (acquired by Takeaway). BGMenu and Oliviera applications are their mobile front-end and allow users to search for more than 500 restaurants in 12 cities, review their menus and order meals directly from their devices.

Solution

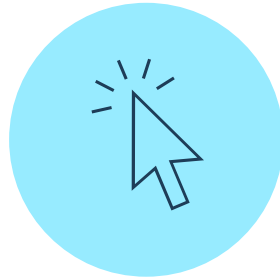

- Advanced ordering
- Real-time communication / messaging
- Integrated payment system
- Optimized feedback module
- Ratings and recommendations options
- Reporting and analytics
- Cloud-based & enhanced data protection and confidentiality rules
